UJ3-A

Auth consent

Does a check the SPL happen?

A:
• Matches to NHS number
• Checks if Auth consent given for SVPS service

B:
• Checks if previous SVPS submission (DynamoDB)? If YES, can we assume they are on SPL too (has DynamoDB been cross-checked with SPL?)

C:
• SPL check could go here - what is the journey for not found? Allow completion? Contest/appeal link?
• Do we want to design so the DynamoDB cannot include people who are not on SPL?

TRIGGER → PUSH → SVPS Service page

Have you had a letter from the NHS or been told by your doctor to 'shield' because you're clinically extremely vulnerable to coronavirus?

Do you have any of the listed medical conditions?

Sorry, you're not eligible for help through this service
